EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Bauersfeld on October 27, 2004.

The application has been amended as follows:

In the claims:

Claim 13, line 2, --at least one-- has been inserted between "said" and "water".

Claim 13, line 2, "means" has been deleted.

Claim 37, line 23, "is" has been replaced by --in--.

2. The following is an examiner's statement of reasons for allowance:

The prior art, alone or in combination, did not teach or fairly suggest a rotating stream sprinkler including a rotatable deflector having an upper surface defining a radially outwardly inclined ramp, and each of the at least one ball track having a drive ball movably carried therein and supported on the inclined ramp, the at least one drive ball arranged for repetitious impact engagement on at least one anvil carried by the deflector upon rotor rotation exceeding the predetermined rotational speed, together with the other claimed limitations as set forth in claims 1 and 21.

Art Unit: 3752

The prior art, alone or in combination, did not teach or fairly suggest a rotating stream sprinkler, including a flow rate adjustment assembly having a rotatable adjustment screw, an adjustment nut axially translatable on the screw upon rotation thereof, and a resilient restrictor element being compressible by the nut upon rotation of the screw for varying the cross sectional size of the at least one flow channel thereby variably throttling water flow to the sprinkler, together with the other claimed limitations as set forth in claim 37.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents to Walker et al., Zakai, and Rosenberg, are cited as of interest.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Darren W Gorman whose telephone number is 703-306-4205.
